Trips

With the BikeTrax route diary (trips) you have **full control over your tour data** and can delete individual routes or route sections. This is useful if you don't want to save certain routes in the diary, because e.g. the e-bike was transported by car.

1

Delete routes and route sections

- ≡ Open app navigation
- ↓
- 📁 Select „Trips“
- ↓
- Select requested route

Delete entire route
🗑️ Select „trash“ icon at the top right and confirm

Delete route section
Select requested route section -> swipe left -> 🗑️ Select „trash“ icon and confirm

2

Delete all recorded routes

- ≡ Open app navigation
- ↓
- ⚙️ Select settings of the requested BikeTrax
- ↓
- 🗑️ Select „trash“ icon at the top right and confirm

ATTENTION: The data cannot be restored after deletion.

- 1 Before deleting individual routes/track sections, check carefully whether you have selected the correct route or track section!
- 2 If you have deleted all data of your BikeTrax, you must reassign BikeTrax from scratch and re-enter all information in the settings.

We protect your data: After one year at the latest, all deleted routes and route sections are permanently removed from all system backups.

News

In our newsfeed we inform you regularly about

- 1 New app features
- 2 Current product developments
- 3 Tips and tricks around the e-bike

4

SHARE BIKE TRAX

With the „Share BikeTrax“ feature, you allow others to view your rides and GPS data, your backup status, and your Bike Pass details.

- ≡ Open app navigation
- ↓
- Select „Share BikeTrax“
- ↓
- Select „add user“ and enter your email address

If the selected person confirms your invitation in the email sent, they will see your e-bike in their own PowUnity app.

IMPORTANT: The people you share your BikeTrax with cannot delete your rides or route segments or change the name of your BikeTrax.

BIKE TRAX GPS anti-theft protection for e-bikes

QUICK START

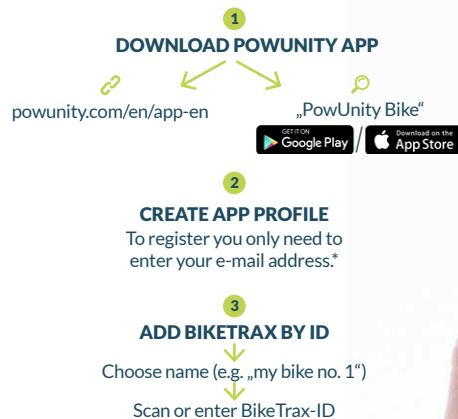

Introduction to the PowUnity app

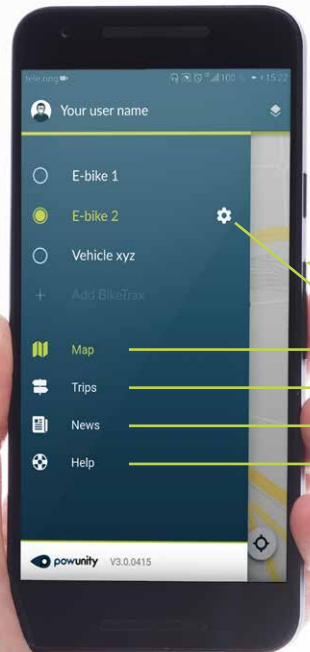

POWUNITY.COM

GETTING STARTED WITH THE POWUNITY APP

* **ATTENTION:** Be sure to remember how you registered the first time. You always have to log in with the same user data (e-mail password combination). BikeTrax can only be assigned ONCE to a specific app profile.

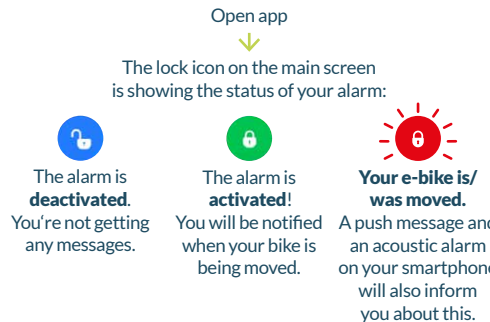

All your vehicles which are equipped with BikeTrax are listed in the app. You can add any number of additional vehicles by BikeTrax-ID.

Help FAQs concerning BikeTrax

In case of a theft:
Bike Passport (see 1)

Do not forget: Activate/deactivate alarm!

Whenever you are not riding your e-bike, you should activate the alarm so that you are informed of any unauthorized movement of your e-bike on your smartphone:

IMPORTANT: The **initial operation** of your BikeTrax GPS tracker **should be performed outdoors**. This will ensure a fast connection with good network coverage.

The PowUnity app can be used on multiple devices simultaneously.

It's as simple as that:

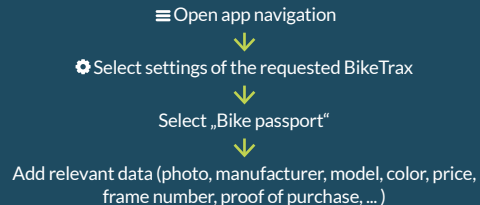

1 Bike Passport

After a theft, **quick reaction** is important! BikeTrax offers **two features** that allow you to easily and quickly transmit the necessary data to the nearest police station if your bike has been stolen.

1 BIKE PASSPORT

You should completely fill out the profile for your e-bike (bike passport) as soon as you start using BikeTrax!

TIPPS:
It is especially important to report the frame number! The profile can be edited at any time.

2 THEFT REPORT

The theft report should be made as soon as possible after the theft.
