

## 6. Select mounting point and place BikeTrax

Depending on your e-bike model, different mounting points are possible for the BikeTrax GPS tracker. Use cable ties or double-sided adhesive tape to mount it on a suitable position, for example ...

### Checklist for positioning the BikeTrax GPS tracker:

The GPS antenna should face outward.  
The tracker is mainly surrounded by plastic and not hidden in the frame.  
The cables are neatly laid and are not bent.

### Checklist for positioning the additional battery:

The battery is well secured.  
The battery is protected from moisture.

## 7. Place BikeTrax additional battery

The additional battery can be placed anywhere in the engine compartment. Mount it with double-sided adhesive tape, for example ...

8.

## 8. Reattach cable cover

Make sure that the mounted parts are under no stress. The cover should fit snugly onto the threaded holes of the frame and be screwed tightly.

# PACKAGE CONTENTS

IMPORTANT: Your Power Port must be unlocked before installing the BikeTrax GPS tracker! Talk to your e-bike dealer about this!

Every e-bike model is different, and especially the cable covers are available in a variety of different designs. **Therefore we ask for your understanding if the illustrations in this assembly instruction and the motor of your e-bike don't correspond.**

1.

## 1. Remove cable cover

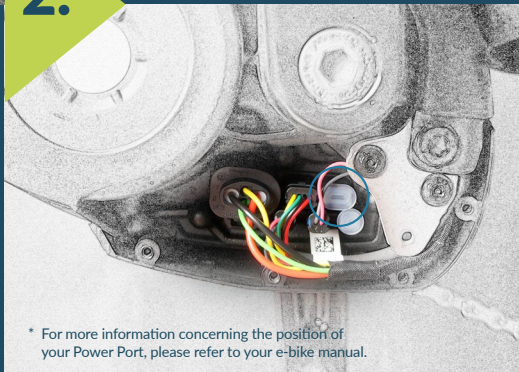

The cable cover of your e-bike can easily be removed with the right tools.

2.

## 2. Remove the Power Port's blanking plug

To expose the Power Port, the silicone blanking plug must be removed. ATTENTION: The Power Port must not be confused with the display connection!

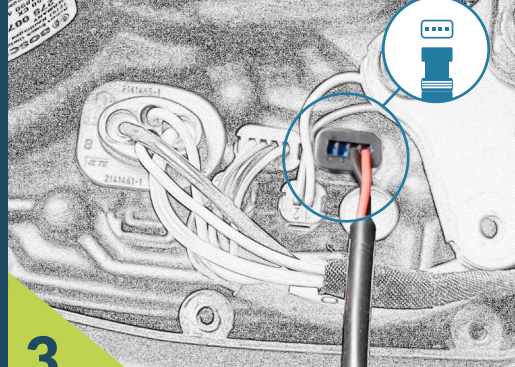

\* For more information concerning the position of your Power Port, please refer to your e-bike manual.

3.

## 3. Plug in BikeTrax connection cable

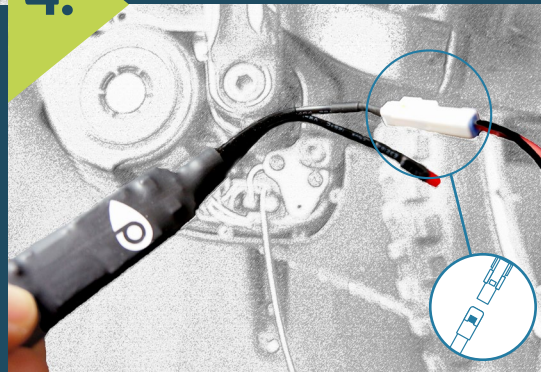

Observe insertion direction. The „nose“ of the connector plug belongs in the recess of the Power Port plug.

4.

## 4. Connect BikeTrax GPS tracker

The BikeTrax GPS tracker is coupled with the connection cable.

5.

## 5. Connect BikeTrax additional battery

Then connect the additional battery to the BikeTrax GPS tracker.
